Deep Discovery Inspector is a third-generation threat management solution that delivers advanced persistent threat (APT) and targeted attack visibility, insight, and control. Deep Discovery Inspector provides IT administrators with critical security information, alerts, and reports.

### Opening and Inspecting the Carton
Verify that the Deep Discovery Inspector carton contains the following items:

1. Rack rails
2. Document and DVD
3. Power cords
4. Deep Discovery Inspector appliance

### Examining the Deep Discovery Inspector Appliance

#### Front Panel
- Power button (behind the bezel)
- Lock
- LED indicator
- Appliance status indicator connector
- Appliance ID button
- Serial port
- USB 2.0 connectors
- Video connector

#### Back Panel
- Power supply connector
- Management port
- USB 2.0 connectors
- Appliance ID button
- Video connector
- Appliance status indicator connector
- Serial port

Note: Dual AC power slots provide protection in case one of the AC power slots fails.

### Recommended Network Environment
Deep Discovery Inspector is deployed offline. This means that Deep Discovery Inspector does not interrupt network traffic. A switch monitors both internal and external traffic and passes the information to Deep Discovery Inspector. Deep Discovery Inspector uses this information to monitor known and potential threats. You can connect switches with a mirror port to any of the data ports. Deep Discovery Inspector uses these ports as listening ports and will not interrupt traffic handled by the switches.

### Setting Up the Hardware
1. Mount the Deep Discovery Inspector appliance in a standard 19-inch 4-post rack, or on a free-standing object, such as a sturdy desk.
2. Connect the appliance to a power source.
3. Connect the monitor to the VGA port at the back of the appliance.
4. Connect the keyboard and mouse to the USB ports at the back of the appliance.
5. Connect the management port to your network.
6. Power on the appliance.

### Performing Initial Configuration: Preconfiguration Console
Perform the initial preconfiguration from the Preconfiguration Console with any of the following:

- **VGA port**
- **Serial port**

For details on how to access the Preconfiguration Console, see the Preconfiguration chapter in the Administrator’s Guide.

1. On the Preconfiguration Console main menu, type 2 to select Device Settings and press Enter.
2. On the Device Settings screen, configure IP address settings. To set a dynamic IP address: Use the space bar to toggle the IP address option to dynamic. To set a static IP address:
   - In the Type field, use the space bar to toggle the IP address option to static.
   - Type the following network settings:
     - **IP address (IPv4)**: the default is 192.168.252.1
     - **Subnet mask**: the default is 255.255.255.0
     - **Default Gateway**: the default is 192.168.252.254
     - (Optional) DNS Server 1
     - (Optional) DNS Server 2
     - **Host name**: the default is localhost
3. On the logon screen, type the following default credentials:
   - **User name**: admin
   - **Password**: admin
4. Click Log On.
5. Type a new password, and then retype it to confirm.
7. On Administration > System Settings > Time / Encoding Options, set the system time.
9. To configure post-deployment settings, follow the steps in the Setup Guide. For details on how to set up your threat protection, see the Get Started chapter in the Administrator’s Guide.
10. Connect the data port(s) on your Deep Discovery appliance to the traffic flows you want to monitor.

### Deployment Checklist

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Activation Code</td>
<td>Obtain from Trend Micro</td>
</tr>
<tr>
<td>Monitor and VGA cable</td>
<td>Connects to the USB part of the appliance</td>
</tr>
<tr>
<td>USB keyboard</td>
<td>Connects to the USB part of the appliance</td>
</tr>
<tr>
<td>USB mouse</td>
<td>Connects to the USB part of the appliance</td>
</tr>
<tr>
<td>Ethernet cable</td>
<td>One cable connects the management port of the appliance to the management network.</td>
</tr>
<tr>
<td>Dual AC power slots</td>
<td>Dual AC power slots provide protection in case one of the AC power slots fails.</td>
</tr>
<tr>
<td>Internet-enabled computer</td>
<td>A computer with the following software installed:</td>
</tr>
<tr>
<td>- Google™ Chrome: 40.0 or later</td>
<td></td>
</tr>
<tr>
<td>- Microsoft™ Internet Explorer: 10.0 or 11.0</td>
<td></td>
</tr>
<tr>
<td>- Mozilla™ FireFox™: 35.0 or later</td>
<td></td>
</tr>
<tr>
<td>- Adobe Flash Player 11.0 or later</td>
<td></td>
</tr>
<tr>
<td>IP addresses</td>
<td>One static IP address is in the management network</td>
</tr>
<tr>
<td>- Optional: One additional IP address for an internal Virtual Analyzer, if connected to a specified network with Internet connectivity</td>
<td></td>
</tr>
</tbody>
</table>

Note: Deep Discovery Inspector 3.8 can be deployed in IPv6 environments.

### Performing Initial Configuration: Management Console
1. Using a supported web browser, open the management console at: http://<Deep Discovery Inspector IP Address>.
2. If prompted to set a password, type the following default credentials:
   - **User name**: admin
   - **Password**: admin
3. Click Log On.
4. Type a new password, and then retype it to confirm.
5. On Administration > System Settings > Time / Encoding Options, set the system time.
7. To configure post-deployment settings, follow the steps in the Setup Guide. For details on how to set up your threat protection, see the Get Started chapter in the Administrator’s Guide.
8. Connect the data port(s) on your Deep Discovery appliance to the traffic flows you want to monitor.
