Deep Discovery Inspector is a third-generation threat management solution that delivers advanced persistent threat (APT) and targeted attack visibility, insight, and control.

Deep Discovery Inspector provides IT administrators with critical security information, advanced persistent threat (APT) and targeted attack visibility, insight, and control.

**Deep Discovery Inspector Appliance**

- Rack rails
- Document and DVD
- Power cords
- Deep Discovery Inspector appliance

**Opening and Inspecting the Carton**

Verify that the Deep Discovery Inspector carton contains the following items:

1. Rack rails
2. Document and DVD
3. Power cords
4. Deep Discovery Inspector appliance

**Examine the Deep Discovery Inspector Appliance**

**Front Panel**

1. Power button (behind the bezel)
2. Lock
3. Serial connector
4. USB connector
5. Management port

**Back Panel**

1. Power button (defend the bezel)
2. IDrac connector
3. Video connector
4. Data ports
5. Management port

**Recommended Network Environment**

Deep Discovery Inspector does not interrupt network traffic. A switch monitors both internal and external traffic and passes the information to Deep Discovery Inspector. Deep Discovery Inspector uses this information to monitor known and potential threats.

**Deployment Checklist**

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Activation Code</td>
<td>Obtain from Trend Micro</td>
</tr>
<tr>
<td>Monitor and VGA cable</td>
<td>Connects to the VGA port of the appliance</td>
</tr>
<tr>
<td>USB keyboard</td>
<td>Connects to the USB port of the appliance</td>
</tr>
<tr>
<td>USB mouse</td>
<td>Connects to the USB port of the appliance</td>
</tr>
<tr>
<td>Ethernet cables</td>
<td>Connects to the management port of the appliance</td>
</tr>
<tr>
<td>Internet-enabled computer</td>
<td>Connects to the specified network that is reserved for an internal Virtual Analyzer.</td>
</tr>
<tr>
<td>IP addresses</td>
<td>Connects to the given IP address in the management network.</td>
</tr>
</tbody>
</table>

**Setting Up the Hardware**

1. Mount the Deep Discovery Inspector appliance in a standard 19-inch 4-post rack, or on a free-standing object, such as a sturdy desk.
2. Connect the appliance to a power source.
3. Connect the monitor to the VGA port at the back of the appliance.
4. Connect the keyboard and mouse to the USB ports at the back of the appliance.
5. Connect the management port to your network.
6. Power on the appliance.

**Performing Initial Configuration: Management Console**

1. Using a supported web browser, open the management console at: https://<Deep Discovery Inspector IP Address>/
2. On the logon screen, type the following default credentials:
   - User name: admin
   - Password: admin
3. Click Log On.
4. If a new password is required, then retype it to confirm.
5. On Administration > System Settings > Time / Encoding Options, set the system time.
7. To configure post-deployment settings, follow the steps in the Setup Guide.

**Performing Initial Configuration: Preconfiguration Console**

1. On the Preconfiguration Console main menu, type 2 to select Device Settings and press Enter.
2. On the Device Settings screen, configure IP address settings.
   - To set a dynamic IP address, use the space bar to toggle the IP address option to dynamic.
   - To set a static IP address:
     A. In the Type field, use the space bar to toggle the IP address option to static.
     B. Type the following network settings:
        - IP address (IPv4): the default is 192.168.252.1
        - Subnet mask: the default is 255.255.255.0
        - Gateway: the default is 192.168.252.254
   - Type (Optional) DNS server 1
   - Type (Optional) DNS server 2
   - Host name: the default is localhost
3. Type (Optional) VLAN ID.
4. (Optional) Register to Trend Micro Control Manager by using the space bar to toggle the option to yes.
5. Navigate to Return to main menu and press Enter.
6. The initial configuration is complete and the management console is accessible.

**Performing Initial Configuration: Preconfiguration Console**

1. On the Preconfiguration Console main menu, type 2 to select Device Settings and press Enter.
2. On the Device Settings screen, configure IP address settings.
   - To set a dynamic IP address, use the space bar to toggle the IP address option to dynamic.
   - To set a static IP address:
     A. In the Type field, use the space bar to toggle the IP address option to static.
     B. Type the following network settings:
        - IP address (IPv4): the default is 192.168.252.1
        - Subnet mask: the default is 255.255.255.0
        - Gateway: the default is 192.168.252.254
   - Type (Optional) DNS server 1
   - Type (Optional) DNS server 2
   - Host name: the default is localhost
3. Type (Optional) VLAN ID.
4. (Optional) Register to Trend Micro Control Manager by using the space bar to toggle the option to yes.
5. Navigate to Return to main menu and press Enter.
6. The initial configuration is complete and the management console is accessible.
