Deep Discovery Inspector provides IT administrators with critical security information, and to target threat management solution that delivers advanced persistent threat (APT) and targeted attack visibility, insight, and control.

Deep Discovery Inspector facilitates the following tasks:
- Monitoring network traffic
- Detecting and analyzing threats
- Providing real-time threat intelligence
- Enabling immediate response actions

Deep Discovery Inspector uses this information to monitor known and potential threats.

**Opening and Inspecting the Carton**
Verify that the Deep Discovery Inspector carton contains the following items:

1. Rack rails
2. Document and DVD
3. Power cords
4. Deep Discovery Inspector appliance

**Examining the Deep Discovery Inspector Appliance**

**Front Panel**
- Power-on indicator/button
- Rack rails
- USB 3.0 connector
- USB 2.0 connector
- LCD panel
- LCD menu buttons
- Front video connector

**Back Panel**
- Rear USB 2.0 connector
- Rear appliance ID button/status indicator
- Rear video connector
- Power supply connectors (2)
- Data port 1 (1 Gbps)
- Data port 2 (1 Gbps)
- Data port 3 (1 Gbps)
- Data port 5 (1 Gbps)
- iDRAC port
- RS-232 serial connector

**Recommended Network Environment**
Deep Discovery Inspector is deployed offline. This means that Deep Discovery Inspector does not intercept network traffic. A switch monitors both internal and external traffic and passes the information to Deep Discovery Inspector. Deep Discovery Inspector uses this information to monitor known and potential threats.

You can connect switches with a mirror port to any of the data ports. Deep Discovery Inspector uses these ports as listening ports and will not interrupt traffic handled by the switches.

**Deployment Checklist**

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Activation Code</td>
<td>Obtain from Trend Micro</td>
</tr>
<tr>
<td>Monitor and VGA cable</td>
<td>Connects to the VGA port of the appliance</td>
</tr>
<tr>
<td>USB keyboard</td>
<td>Connects to the USB port of the appliance</td>
</tr>
<tr>
<td>USB mouse</td>
<td>Connects to the USB port of the appliance</td>
</tr>
</tbody>
</table>
| Ethernet cables | \( \text{One cable connects the management port of the appliance to the management network.} \)  
\( \text{One or more cables connect the data port with a switch mirror port to monitor traffic.} \)  
\( \text{Optional: One cable connects a data port to a specified network that is reserved for an internal Virtual Analyzer.} \) |
| Internet-enabled computer | A computer with the following software installed:  
\( \text{Google Chrome \( \geq \) 46.0 or later} \)  
\( \text{Microsoft Internet Explorer \( \geq \) 10.0 or 11.0} \)  
\( \text{Micro Focus \( \geq \) 11.5 or later} \)  
\( \text{Adobe Flash player \( \geq \) 8.0 or later} \)  
\( \text{One or more cables connect the data port with a switch mirror port to monitor traffic.} \)  
\( \text{Optional: One additional IP address for an internal Virtual Analyzer, if connected to a specified network with Internet connectivity.} \) |
| IP addresses | One static IP address in the management network |
| Note | Dual AC power slots provide protection in case one of the AC power slots fails. |

**Performing Initial Configuration: Management Console**

1. Using a supported web browser, open the management console at: https://<Deep Discovery Inspector IP Address>

2. On the Preconfiguration Console main menu, type 2 to select Device Settings and press Enter.

   **To set a static IP address:**
   - Use the space bar to toggle the IP address option to static.
   - Type the following network settings:
     - **IP address (IPv4):** the default is 192.168.252.1
     - **Subnet mask:** the default is 255.255.255.0
     - **Gateway:** the default is 192.168.252.2
     - (Optional) **DNS Server 1**
     - (Optional) **DNS Server 2**

   **Note:** Deep Discovery Inspector 3.8 Service Pack 2 can be deployed in IPv6 environments.

4. (Optional) Type a VLAN ID.
5. Navigate to Return to main menu and press Enter.

The initial configuration is complete and the management console is accessible.

**Setting Up the Hardware**
1. Mount the Deep Discovery Inspector appliance in a standard 19-inch 4-post rack, or on a free-standing object, such as a study desk.

   **Note:** When mounting the appliance, leave at least two inches of clearance on all sides for proper ventilation and cooling.

2. Connect the appliance to a power source.
3. Connect the monitor to the VGA port at the back of the appliance.
4. Connect the keyboard and mouse to the USB ports at the back of the appliance.
5. Connect the management port to your network.
6. Power on the appliance.

**Performing Initial Configuration: Preconfiguration Console**
Perform the initial preconfiguration from the Preconfiguration Console with any of the following:

- **VGA port**
- **Serial port**

For details on how to access the Preconfiguration Console, see the Preconfiguration chapter in the Installation and Deployment Guide.

1. On the Preconfiguration Console logon screen, type the following default logon credentials:
   - **User name:** admin
   - **Password:** admin

**Contact Information**
