TREND MICRO® Deep Discovery Inspector 4100 Quick Start Card

Deep Discovery Inspector is a three-generation threat management solution that delivers advanced persistent threat (APT) and targeted attack visibility, insight, and control. Deep Discovery Inspector provides IT administrators with critical security information, alerts, and reports.

**Opening and Inspecting the Carton**
Verify that the Deep Discovery Inspector carton contains the following items:

1. Rack rails
2. (2) Document and DVD
3. Power cords
4. Deep Discovery Inspector appliance

**Examining the Deep Discovery Inspector Appliance**

**Recommended Network Environment**
Deep Discovery Inspector is deployed offline. This means that Deep Discovery Inspector does not interpret network traffic. A switch monitors both internal and external traffic and passes the information to Deep Discovery Inspector. Deep Discovery Inspector uses this information to monitor known and potential threats.

You can connect switches with a mirror port to any of the ports except the management port. Deep Discovery Inspector uses these ports as listening ports and will not interpret traffic handled by the switches. Trend Micro recommends using a specified network when using an internal Virtual Analyzer for analyzing samples. Finally, specified networks are connected to the Internet, but do not have proxy settings, proxy authentication, or any connection limitations.

To plan your network deployment environment, see the Deployment section in the Installation and Deployment Guide.

**Deployment Checklist**

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Activation Code</td>
<td>Obtain from Trend Micro</td>
</tr>
<tr>
<td>Master and VGA cable</td>
<td>Connects to the USB port of the appliance</td>
</tr>
<tr>
<td>USB keyboard</td>
<td>Connects to the USB port of the appliance</td>
</tr>
<tr>
<td>Ethernet cables</td>
<td>One cable connects the management port of the appliance to the management network.</td>
</tr>
<tr>
<td></td>
<td>One or more cables connect a switch router to any port of the appliance except the management port to monitor traffic.</td>
</tr>
<tr>
<td></td>
<td>Wired adapter must be enabled.</td>
</tr>
<tr>
<td></td>
<td>USB network adapter connected with any port of the appliance except the management port.</td>
</tr>
</tbody>
</table>

**Installing software**
A computer with the following software installed:
- Google Chrome version 80 or later
- Microsoft Internet Explorer 5.0
- Microsoft Edge
- Mozilla Firefox 4.0 or later
- Adobe Flash Player 4.0 or later

**IP addresses**
- One static IP address in the management network:
  - Provided by the user, or from a specified network with Internet connectivity

**Setting Up the Hardware**
1. Mount the Deep Discovery Inspector appliance in a standard 19-inch 4-post rack, or on a free-standing stand, such as a sturdy desk. **Note**: Mounting the appliance, leave at least two inches of clearance on all sides for proper ventilation and cooling.
2. Connect the appliance to a power source.
3. Connect the monitor to the VGA port at the back of the appliance.
4. Connect the keyboard and mouse to the USB ports at the back of the appliance.
5. Connect the management port to your network.
6. Power on the appliance.

**Performing Initial Configuration: Preconfiguration Console**
Perform the initial preconfiguration from the Preconfiguration Console with any of the following:
- VGA port
- Serial port

For details on how to access the Preconfiguration Console, see the Preconfiguration chapter in the Installation and Deployment Guide.

**Performing Initial Configuration: Management Console**

1. On the Preconfiguration Console login screen, type the following default login credentials:
   - User name: admin
   - Password: admin
2. On the Preconfiguration Console main menu, type 2 to select Device Settings and press Enter.
4. On the installation and deployment environment, see the Deployment section in the Installation and Deployment Guide.

**Performing Initial Configuration**

4. Type a new password, and then retype it to confirm.
5. On Administration > System Settings > Time, set the system time.

**Performing Initial Configuration: Management Console**

1. On the Management Console login screen, type the following default login credentials:
   - User name: admin
   - Password: admin
2. On the Management Console main menu, type 2 to select Device Settings and press Enter.
4. On the installation and deployment environment, see the Deployment section in the Installation and Deployment Guide.
