Deep Discovery Inspector is a third-generation threat management solution that delivers advanced persistent threat (APT) and targeted attack visibility, insight, and control. Deep Discovery Inspector provides IT administrators with critical security information, alerts, and reports.

1. Opening and Inspecting the Carton
   Verify that the Deep Discovery Inspector carton contains the following items:
   - Rack rails
   - Document and DVD
   - Power cords
   - Deep Discovery Inspector appliance

2. Examining the Deep Discovery Inspector Appliance
   
3. Recommended Network Environment
   Deep Discovery Inspector is deployed offline. This means that Deep Discovery Inspector does not interrupt network traffic. A switch monitors both internal and external traffic and passes the information to Deep Discovery Inspector. Deep Discovery Inspector uses this information to monitor known and potential threats.

4. Deployment Checklist
   - Application Code
   - Manual and VGA cable
   - USB keyboard
   - USB mouse
   - Ethernet cable
   - Front panel
   - Back panel

5. Setting Up the Hardware
   1. Mount the Deep Discovery Inspector appliance in a standard 19-inch 4-post rack, or on a freestanding desk, with sufficient space for proper ventilation and cooling.
   2. Connect the appliance to a power source.
   3. Connect the monitor to the VGA port at the back of the appliance.
   4. Connect the keyboard and mouse to the USB ports at the back of the appliance.
   5. Connect the management port to your network.
   6. Turn on the appliance.

6. Performing Initial Configuration: Preconfiguration Console
   Perform the initial preconfiguration from the Preconfiguration Console with any of the following:
   - VUA port
   - Serial port

7. Performing Initial Configuration: Management Console
   1. Using a supported web browser, open the management console at https://<IP address of Deep Discovery Inspector>.
   2. Log in, type the following default credentials:
      - User name: admin
      - Password: admin
   3. On the Preconfiguration Console main menu, type 2 to select Device Settings and press Enter.
   4. On the Device Settings screen, configure IP address settings, and type the static IP address.
   5. To set a static IP address:
      - Type the following network settings:
      - IP address (IPv4): the default is 192.168.252.1
      - Subnet mask: the default is 255.255.255.0
      - Gateway: the default is 192.168.252.254
      - DNS server 1
      - DNS server 2
   6. Note: Deep Discovery Inspector 3.9 and above can be deployed in IPv6 environments.
