

# Installing Trend Micro™ SafeSync

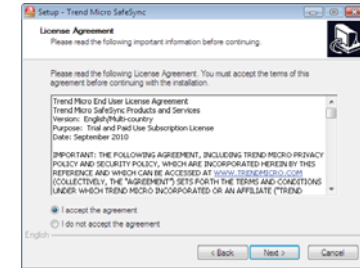

Trend Micro SafeSync lets you store all your valuable documents, photos, videos, and music in one secure place. It automatically keeps your files backed up, synchronized, and accessible any time from any device with an Internet connection.

## Ready to get started? Just follow the steps below.

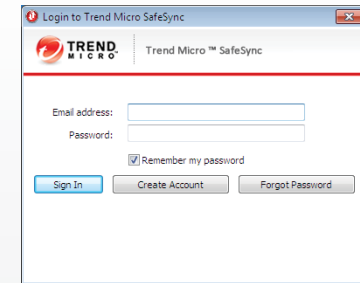

- 1 Visit the Trend Micro SafeSync website and create an account: <https://www.safesync.com>
- 2 Download the Trend Micro SafeSync installer from the website by clicking **Download Now**.
- 3 When asked if you want to Save or Run the executable file, click **Run**.
- 4 When the welcome screen appears, click **Next**.

- 5 Read the License Agreement carefully. If you agree to the terms, mark the "I accept the agreement" radio button, and then click **Next**.

- 6 When the window for signing into Trend Micro SafeSync appears, provide your email address and password, then click **Sign In**.

- 7 When the "Backup this computer" window appears, select the folders that you want to synchronize, and then click **Next**.

**Note:**  
If you would rather select folders later, click **Skip** to finish the installation.

- 8 Follow the instructions on the following screens to start synchronizing files with your online drive.
