Chapter 2

Trend Micro Apex One Edge Relay Server Installations

This section outlines the Trend Micro Apex One Edge Relay Server system requirements on supported Windows Server platforms.

- [Edge Relay Server System Requirements on page 2-2](#)

Edge Relay Server System Requirements

Before installing the Edge Relay Server, ensure that the target server computer meets the minimum system requirements.

RESOURCE	REQUIREMENTS
Processor	2 GHz dual core
Memory	1 GB (exclusively for the Edge Relay Server)
Disk space	60 GB
Operating system	<ul style="list-style-type: none">• Windows Server 2016• Windows Server 2012 R2
Network card	<ul style="list-style-type: none">• 2 network cards<ul style="list-style-type: none">• One for intranet connection to the Apex One server• One for external connection to off-premises Security Agents• 1 network card configured to use different ports for intranet and Internet connections

Chapter 3

Apex One Security Agent System Requirements

This section outlines the Apex One Security Agent system requirements for fresh installations on supported Windows platforms.

- [Fresh Installations on Windows Endpoint Platforms on page 3-2](#)
- [Fresh Installations on Windows Embedded System Platforms on page 3-4](#)
- [Fresh Installations on Windows Server Platforms on page 3-5](#)
- [Update Agents on page 3-9](#)

Important

Resource spikes may occur if a large number of applications are running simultaneously on an endpoint. If the target endpoint is already running low on memory or disk space, Trend Micro recommends upgrading the necessary hardware components prior to Apex One Security Agent installation or upgrade.

Trend Micro recommends allocating the minimum system requirements listed as dedicated resources for the Security Agent program to ensure adequate performance during extensive scanning operations.

Fresh Installations on Windows Endpoint Platforms

Important

Resource spikes may occur if a large number of applications are running simultaneously on an endpoint. If the target endpoint is already running low on memory or disk space, Trend Micro recommends upgrading the necessary hardware components prior to Apex One Security Agent installation or upgrade.

Trend Micro recommends allocating the minimum system requirements listed as dedicated resources for the Security Agent program to ensure adequate performance during extensive scanning operations.

**Note**

- The Security Agent supports Windows Embedded systems when installed with specific core components. For detailed information regarding Windows Embedded system required components, see the Trend Micro Knowledge Base (<https://success.trendmicro.com/solution/1105117>).
 - Due to the complexity of Windows Embedded systems, Apex One may not be able to support all optional Windows components. Contact your technical support team if you encounter incompatibilities when using a combination of optional components.

Chapter 4

Upgrades and Virtualization Support

This section outlines the system requirements for upgrading the server and agent programs, and supported virtualization platforms.

- *Apex One Server Upgrade Requirements on page 4-2*
- *Security Agent Upgrade Requirements on page 4-2*
- *Apex One Server Web Console Requirements on page 4-3*
- *Virtual Desktop Support System Requirements on page 4-3*

Apex One Server Upgrade Requirements

Apex One Patch 3 supports upgrading from the following versions:

- Apex One 2019

Before upgrading, ensure that the server meets the necessary hardware requirements for your version of Windows.

For more information, see [Apex One Server Installations on page 1-1](#).

Security Agent Upgrade Requirements

Apex One 2019 supports upgrading from the following versions:

- OfficeScan XG SP1
- OfficeScan XG
- OfficeScan 11.0 SP1

Keep your older OfficeScan servers if you have agents running Windows XP (or earlier), Windows 8.0, or Windows Server 2008 (or earlier) and you want to continue managing these agents. For details on managing these agents, see the topic *Unsupported Operating Systems* in the *Installation and Upgrade Guide*.

Important

Resource spikes may occur if a large number of applications are running simultaneously on an endpoint. If the target endpoint is already running low on memory or disk space, Trend Micro recommends upgrading the necessary hardware components prior to Apex One Security Agent installation or upgrade.

Trend Micro recommends allocating the minimum system requirements listed as dedicated resources for the Security Agent program to ensure adequate performance during extensive scanning operations.

Apex One Server Web Console Requirements

RESOURCE	REQUIREMENTS
Processor	300MHz Intel Pentium processor or equivalent
RAM	128MB minimum
Available disk space	30MB minimum
Display	Monitor that supports 1366 x 768 resolution at 256 colors or higher
Browser	<ul style="list-style-type: none"> • Microsoft Internet Explorer 10.0 (or later) • Chrome • Microsoft Edge (Legacy and Chromium editions) <hr/>  Note Windows UI is not supported.

Virtual Desktop Support System Requirements

The following table lists the virtual platforms supported by Virtual Desktop Support.

VIRTUALIZATION PROVIDER	SUPPORTED PLATFORMS
VMware	<ul style="list-style-type: none"> • VMware vCenter: 5.x, 6.x, 7.x • VMware View: 4.x, 5.x, 6.x • VMware Horizon View: 6.x, 7.x
Citrix	<ul style="list-style-type: none"> • Citrix XenServer: 6.x, 7.x
