

Deep Discovery Director - Network Analytics 9200 Quick Start Card

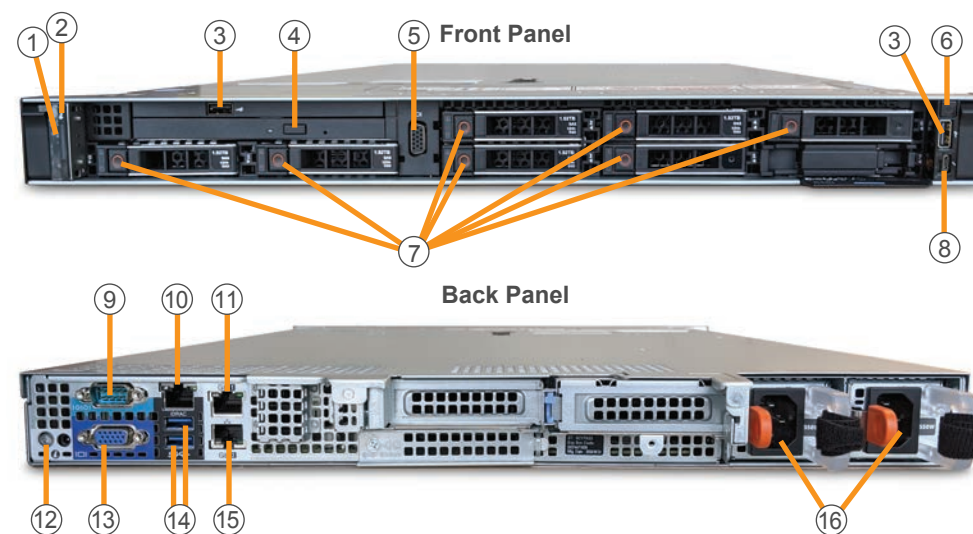

Deep Discovery Director - Network Analytics provides advanced threat analysis for data correlations made between detections selected in Deep Discovery Director and other related events as they occur over time.

1 Opening and Inspecting the Carton

Verify that Deep Discovery Director - Network Analytics carton contains the following items:

2 Examining the Deep Discovery Director - Network Analytics Appliance

- (1) Status LED indicators
- (2) Front ID button/indicator
- (3) USB connector (2)
- (4) Optical drive
- (5) Front video connector
- (6) Power-on button/indicator
- (7) Hard drives (7)
- (8) iDRAC Direct port (Micro-AB USB)
- (9) RS-232 serial connector
- (10) iDRAC port
- (11) Management port
- (12) Rear ID button/indicator
- (13) Rear video connector
- (14) Rear USB connectors (2)
- (15) Eth1 port (used for port binding)
- (16) Power supply connectors (2)

Note: Dual AC power slots provide protection in case one of the AC power slots fails.

3 Deployment Checklist

Requirement	Details
Activation Code	Obtain from Trend Micro
Monitor and VGA cable	Connects to the VGA port of the appliance
USB keyboard	Connects to the USB port of the appliance
USB mouse	Connects to the USB port of the appliance
Ethernet cables	<ul style="list-style-type: none"> One cable connects the management port of the appliance to the management network. (Optional) One cable connects the eth1 port to the network for port binding.
Internet-enabled computer	A computer that has at least one of the following web browsers installed: <ul style="list-style-type: none"> Google™ Chrome™ Microsoft™ Internet Explorer™ 11.0 Mozilla™ FireFox™
IP addresses	<ul style="list-style-type: none"> One static IP address in the management network (Optional) One additional IP address for port binding

4 Setting Up the Hardware

- Mount the Deep Discovery Director - Network Analytics appliance in a standard 19-inch 4-post rack, or on a free-standing object, such as a sturdy desk.

Note: When mounting the appliance, leave at least two inches of clearance on all sides for proper ventilation and cooling.
- Connect the appliance to a power source.
- Connect the monitor to the VGA port at the back of the appliance.
- Connect the keyboard and mouse to the USB ports at the back of the appliance.
- Connect the management port to your network.
- Power on the appliance.

5 Performing Initial Configuration: Preconfiguration Console

Perform the initial preconfiguration from the Preconfiguration Console with any of the following:

- VGA port
- Serial port

For details on how to access the Preconfiguration Console, see the Preconfiguration chapter in the Installation and Deployment Guide.

- On the **Preconfiguration Console** logon screen, type the following default logon credentials:

- User name:** admin
- Password:** admin

- Select **Configure network settings** and then press **Enter**.
- Configure the following required settings:
 - IPv4 address
 - Subnet mask
 - IPv4 gateway
 - DNS server 1

Note: Only IPv4 settings can be configured on the preconfiguration console. To configure IPv6 and port binding, use the **Network** screen on the management console.

- Press **Tab** to navigate to **Save**, and then press **Enter**. The initial configuration is complete and the management console is accessible.

6 Performing Initial Configuration: Management Console

- Using a supported web browser, open the management console at: <https://<Deep Discovery Director - Network Analytics IP Address>>

Note:

- Set the Internet Security level to Medium. Enable ActiveX Binary and Script.
- Use the IP address that you specified during the initial configuration.

- On the logon screen, type the following default credentials:
 - User name:** admin
 - Password:** admin
- Click **Log On**.
- Type a new password, and then retype it to confirm.
- On **Administration > System Settings > Time**, set the system time.
- On **Administration > Licenses**, activate Deep Discovery Director - Network Analytics.
