## **Privacy and Personal Data Collection Disclosure**

Certain features available in Trend Micro products collect and send feedback regarding product usage and detection information to Trend Micro. Some of this data is considered personal in certain jurisdictions and under certain regulations. If you do not want Trend Micro to collect personal data, you must ensure that you disable the related features.

The following link outlines the types of data that Deep Discovery Inspector collects and provides detailed instructions on how to disable the specific features that feedback the information.

<https://success.trendmicro.com/data-collection-disclosure>

Data collected by Trend Micro is subject to the conditions stated in the Trend Micro Privacy Notice:

## Documentation

The documentation set for Deep Discovery Inspector includes the following:

**TABLE 1. Product Documentation**

| DOCUMENT                          | DESCRIPTION   |
|-----------------------------------|---|
| Administrator's Guide             | The Administrator's Guide contains detailed instructions on how to configure and manage Deep Discovery Inspector, and explanations on Deep Discovery Inspector concepts and features.   |
| AWS Deployment Guide              | The AWS Deployment Guide contains information about requirements and procedures for planning deployment, deploying, and troubleshooting Deep Discovery Inspector deployment on AWS.   |
| Installation and Deployment Guide | The Installation and Deployment Guide contains information about requirements and procedures for planning deployment, installing Deep Discovery Inspector, and using the Preconfiguration Console to set initial configurations and perform system tasks.                     |
| Syslog Content Mapping Guide      | The Syslog Content Mapping Guide provides information about log management standards and syntaxes for implementing syslog events in Deep Discovery Inspector.   |
| Quick Start Card                  | The Quick Start Card provides user-friendly instructions on connecting Deep Discovery Inspector to your network and on performing the initial configuration.  |
| Readme                            | The Readme contains late-breaking product information that is not found in the online or printed documentation. Topics include a description of new features, known issues, and product release history.  |
| Online Help                       | <p>Web-based documentation that is accessible from the Deep Discovery Inspector management console.</p> <p>The Online Help contains explanations of Deep Discovery Inspector components and features, as well as procedures needed to configure Deep Discovery Inspector.</p> |

| DOCUMENT       | DESCRIPTION   |
|----------------|---|
| Support Portal | The Support Portal is an online database of problem-solving and troubleshooting information. It provides the latest information about known product issues. To access the Support Portal, go to the following website:<br><a href="https://success.trendmicro.com">https://success.trendmicro.com</a> |

View and download product documentation from the Trend Micro Online Help Center:

<https://docs.trendmicro.com/en-us/home.aspx>

## Audience

The Deep Discovery Inspector documentation is written for IT administrators and security analysts. The documentation assumes that the reader has an in-depth knowledge of networking and information security, including the following topics:

- Network topologies
- Database management
- Antivirus and content security protection

The documentation does not assume the reader has any knowledge of sandbox environments or threat event correlation.

## Document Conventions

The documentation uses the following conventions:

**TABLE 2. Document Conventions**

| CONVENTION  | DESCRIPTION   |
|---|---|
| UPPER CASE  | Acronyms, abbreviations, and names of certain commands and keys on the keyboard   |
| <b>Bold</b>   | Menus and menu commands, command buttons, tabs, and options   |
| <i>Italics</i>  | References to other documents   |
| Monospace   | Sample command lines, program code, web URLs, file names, and program output  |
| <b>Navigation &gt; Path</b>   | The navigation path to reach a particular screen<br><br>For example, <b>File &gt; Save</b> means, click <b>File</b> and then click <b>Save</b> on the interface |
|  <b>Note</b>       | Configuration notes   |
|  <b>Tip</b>        | Recommendations or suggestions  |
|  <b>Important</b>  | Information regarding required or default configuration settings and product limitations  |
|  <b>WARNING!</b> | Critical actions and configuration options  |

## About Trend Micro

Trend Micro, a global leader in cybersecurity, is passionate about making the world safe for exchanging digital information today and in the future. Artfully applying our XGen™ security strategy, our innovative solutions for consumers, businesses, and governments deliver connected security for data centers, cloud workloads, networks, and endpoints.

Optimized for leading environments, including Amazon Web Services, Microsoft®, and VMware®, our layered solutions enable organizations to automate the protection of valuable information from today's threats. Our connected threat defense enables seamless sharing of threat intelligence and provides centralized visibility and investigation to make organizations their most resilient.

Trend Micro customers include 9 of the top 10 Fortune® Global 500 companies across automotive, banking, healthcare, telecommunications, and petroleum industries.

With over 6,500 employees in 50 countries and the world's most advanced global threat research and intelligence, Trend Micro enables organizations to secure their connected world. <https://www.trendmicro.com>

# Chapter 1

## Introduction

The Trend Micro™ Syslog Content Mapping Guide provides information about log management standards and syntaxes for implementing syslog events in Trend Micro Deep Discovery Inspector.

To enable flexible integration with third-party log management systems, Deep Discovery Inspector supports the following syslog formats:

| LOG MANAGEMENT SYSTEM  | DESCRIPTION  |
|--|--|
| Common Event Format (CEF)<br>For details, see <a href="#">Syslog Content Mapping - CEF on page 3-1</a>         | CEF is an open log management standard created by HP ArcSight.<br><br>Deep Discovery Inspector uses a subset of the CEF dictionary.                              |
| Log Event Extended Format (LEEF)<br>For details, see <a href="#">Syslog Content Mapping - LEEF on page 4-1</a> | LEEF is an event format developed for IBM Security QRadar.<br><br>Deep Discovery Inspector uses a subset of the LEEF dictionary.                                 |
| Trend Micro Event Format (TMEF)<br>For details, see <a href="#">Syslog Content Mapping - TMEF on page 5-1</a>  | TMEF is a superset of log fields that allow a third-party syslog collector to better control and mitigate detection events provided by Deep Discovery Inspector. |

## Terminology

| <b>TERM</b> | <b>DESCRIPTION</b>                |
|-------------|-----------------------------------|
| CEF         | Common Event Format               |
| LEEF        | Log Event Extended Format         |
| TMEF        | Trend Micro Event Format          |
| CCCA        | Command and Control Contact Alert |

# Chapter 2

## Revisions

There were no revisions for version 5.7 SP2.

## Chapter 3

### Syslog Content Mapping - CEF

The following tables outline syslog content mapping between Deep Discovery Inspector log output and CEF syslog types:

- *CEF Threat Logs on page 3-2*
- *CEF Disruptive Application Logs on page 3-7*
- *CEF Web Reputation Logs on page 3-9*
- *CEF System Logs on page 3-13*
- *CEF Virtual Analyzer Logs: File Analysis Events on page 3-15*
- *CEF Virtual Analyzer Logs: Notable Characteristics Events on page 3-17*
- *CEF Virtual Analyzer Logs: Deny List Transaction Events on page 3-19*

## CEF Threat Logs

**TABLE 3-1. CEF Threat Logs**

| CEF KEY            | DESCRIPTION              | VALUE  |
|--------------------|--------------------------|--|
| Header (logVer)    | CEF format version       | CEF: 0   |
| Header (vendor)    | Appliance vendor         | Trend Micro  |
| Header (pname)     | Appliance product        | Deep Discovery Inspector   |
| Header (pver)      | Appliance version        | Example: 3.8.1181  |
| Header (eventid)   | Event ID                 | Example: 8   |
| Header (eventName) | Description              | Example: Packed executable file copied to a network administrative share   |
| Header (severity)  | Severity                 | <ul style="list-style-type: none"> <li>• 2: Informational</li> <li>• 4: Low</li> <li>• 6: Medium</li> <li>• 8: High</li> </ul> |
| act                | The action in the event  | blocked or not blocked   |
| app                | Protocol                 | Example: HTTP  |
| c6a1               | Interested IPv6          | Example: 2001:0:0:1::21  |
| c6a1Label          | Interested IPv6          | InterestedIPv6   |
| c6a2               | Source IPv6 address      | Example: 2001:0:0:1::21  |
| c6a2Label          | Source IPv6 address      | Source IPv6 Address  |
| c6a3               | Destination IPv6 address | Example: 2001:0:0:1::21  |
| c6a3Label          | Destination IPv6 address | Destination IPv6 Address   |
| c6a4               | Peer IPv6 address        | Example: 2001:0:0:1::21  |
| c6a4Label          | Peer IPv6 address        | PeerIPv6   |

| CEF KEY  | DESCRIPTION             | VALUE  |
|----------|-------------------------|--|
| cat      | Event category          | Example: File  |
| cnt      | Total count             | Example: 1   |
| cn1      | CCCA detection          | 0 or 1   |
| cn1Label | CCCA detection          | CCCA_Detection   |

# Chapter 4

## Syslog Content Mapping - LEEF

The following tables outline syslog content mapping between Deep Discovery Inspector log output and LEEF syslog types:

- [LEEF Threat Logs on page 4-2](#)
- [LEEF Disruptive Application Logs on page 4-9](#)
- [LEEF Web Reputation Logs on page 4-12](#)
- [LEEF System Logs on page 4-16](#)
- [LEEF Correlation Incident Logs on page 4-17](#)
- [LEEF Virtual Analyzer Logs: File Analysis Events on page 4-20](#)
- [LEEF Virtual Analyzer Logs: Notable Characteristics Events on page 4-22](#)

**Note**

In LEEF log syntax, separate event attributes with a tab delimiter, <009>.

---

## LEEF Threat Logs

**TABLE 4-1. LEEF Threat Logs**

| LEEF KEY              | DESCRIPTION                    | VALUE  |
|-----------------------|--------------------------------|--|
| Header (logVer)       | LEEF format version            | LEEF: 1.0  |
| Header (vendor)       | Appliance vendor               | Trend Micro  |
| Header (pname)        | Appliance product              | Deep Discovery Inspector   |
| Header (pver)         | Appliance version              | Example: 3.8.1181  |
| Header (eventName)    | Event Name                     | <ul style="list-style-type: none"> <li>• MALWARE_DETECTION</li> <li>• MALWARE_OUTBREAK_DETECTION</li> <li>• SECURITY_RISK_DETECTION</li> </ul> |
| act                   | The action in the event        | blocked or not blocked   |
| aggregatedCnt         | Aggregated count               | Example: 1   |
| aptRelated            | Indicates an APT-related event | 0 or 1   |
| botCommand            | BOT command                    | Example: COMMIT  |
| botUrl                | BOT URL                        | Example: trend.com   |
| cccaDestination       | CCCA address                   | Example: 10.1.144.199  |
| cccaDestinationFormat | CCCA type                      | <ul style="list-style-type: none"> <li>• IP_DOMAIN</li> <li>• IP_DOMAIN_PORT</li> <li>• URL</li> <li>• EMAIL</li> </ul>                        |
| cccaDetection         | CCCA detection                 | 0 or 1   |

| LEEF KEY                  | DESCRIPTION             | VALUE  |
|---------------------------|-------------------------|--|
| cccaDetectionSource       | CCCA log is detected by | <ul style="list-style-type: none"> <li>GLOBAL_INTELLIGENCE</li> <li>VIRTUAL_ANALYZER</li> <li>USER_DEFINED</li> </ul>        |
| cccaRiskLevel             | CCCA Risk Level         | <ul style="list-style-type: none"> <li>0: Unknown</li> <li>1: Low</li> <li>2: Medium</li> <li>3: High</li> </ul>             |
| channelName               | Channel name            | Example: IRCChannel1   |
| chatUserName              | Nickname                | Example: IRCUser1  |
| cnt                       | Total count             | Example: 1   |
| compressedFileName        | File name in archive    | Example: mtxlegih.dll  |
| detectionType             | Detection type          | <ul style="list-style-type: none"> <li>0: Known detection</li> <li>1: Unknown detection</li> <li>2: OPS detection</li> </ul> |
| deviceDirection           | Packet direction        | <ul style="list-style-type: none"> <li>0: Source is external</li> <li>1: Source is internal</li> <li>2: Unknown</li> </ul>   |
| deviceGUID                | Appliance GUID          | Example: 6B593E17AFB7-40FB8B28-A4CE-0462-A536  |
| deviceMacAddress          | Appliance MAC address   | Example: 00:0C:29:6E:CB:F9   |
| deviceRiskConfidenceLevel | Confidence level        | <ul style="list-style-type: none"> <li>1: High</li> <li>2: Medium</li> <li>3: Low</li> <li>0: Undefined</li> </ul>           |

| LEEF KEY        | DESCRIPTION                                  | VALUE   |
|-----------------|--|---|
| devTime         | Log generation time                          | Example: Mar 09 2015 17:05:21 GMT +08:00  |
| devTimeFormat   | Time format                                  | MMM dd yyyy HH:mm:ss z  |
| dhost           | Destination host name                        | Example: dhost1   |
| dOSName         | Destination host OS                          | Example: Android  |
| dst             | Destination IP address                       | Example: 10.1.144.199   |
| dstGroup        | Network Group assigned to a destination host | Example: monitor1   |
| dstMAC          | Destination MAC                              | Example: 00:0C:29:6E:CB:F9  |
| dstPort         | Destination port                             | Value between 0 and 65535   |
| dstZone         | Destination zone                             | <ul style="list-style-type: none"> <li>• 0: Not in monitored network</li> <li>• 1: In monitored network and trusted</li> <li>• 2: In monitored network and untrusted</li> </ul> |
| duser           | Mail recipient                               | Example: duser1   |
| dUser1          | Destination user name 1                      | Example: admin  |
| dUser1LoginTime | Destination user log on time 1               | Example: Mar 09 2015 17:05:21 GMT +08:00  |
| dUser2          | Destination user name 2                      | Example: admin  |
| dUser2LoginTime | Destination user log on time 2               | Example: Mar 09 2015 17:05:21 GMT +08:00  |
| dUser3          | Destination user name 3                      | Example: admin  |
| dUser3LoginTime | Destination user log on time 3               | Example: Mar 09 2015 17:05:21 GMT +08:00  |
| dvc             | Appliance IP address                         | Example: 10.1.144.199   |

| LEEF KEY         | DESCRIPTION                  | VALUE  |
|------------------|------------------------------|--|
| dvchost          | Appliance host name          | Example: localhost                                   |
| evtCat           | Event category               | Example: Suspicious Traffic                          |
| evtSubCat        | Event subcategory            | Example: Email                                       |
| fileHash         | SHA1                         | Example:1EDD5B38DE4729545767088C5CAB395E4197C8F3     |
| filePath         | File path                    | Example: SHARE\\                                     |
| fileType         | Real file type               | Example: 1638400                                     |
| fname            | File name                    | Example: excel.rar                                   |
| fsize            | File size                    | Example: 131372                                      |
| hackerGroup      | Hacker group                 | Example: Comment Crew                                |
| hackingCampaign  | Hacking campaign             | Example:Aurora                                       |
| hostName         | Host name                    | Example: CLIENT1                                     |

# Chapter 5

## Syslog Content Mapping - TMEF

The following tables outline syslog content mapping between Deep Discovery Inspector log output and TMEF syslog types:

- *TMEF Threat Logs on page 5-2*
- *TMEF Disruptive Application Logs on page 5-11*
- *TMEF Web Reputation Logs on page 5-15*
- *TMEF System Logs on page 5-20*
- *TMEF Correlated Incident Logs on page 5-22*
- *TMEF Virtual Analyzer Logs: File Analysis Events on page 5-24*
- *TMEF Virtual Analyzer Logs: Notable Characteristics Events on page 5-26*
- *TMEF Virtual Analyzer Logs: Deny List Transaction Events on page 5-28*

## TMEF Threat Logs

**TABLE 5-1. TMEF Threat Logs**

| TMEF KEY           | DESCRIPTION             | VALUE  |
|--------------------|-------------------------|--|
| Header (logVer)    | TMEF format version     | CEF: 0   |
| Header (vendor)    | Appliance vendor        | Trend Micro  |
| Header (pname)     | Appliance product       | Deep Discovery Inspector   |
| Header (pver)      | Appliance version       | Example: 3.8.1181  |
| Header (eventid)   | Event ID                | <ul style="list-style-type: none"> <li>• 100100</li> <li>• 100118</li> <li>• 100119</li> </ul>   |
| Header (eventName) | Event Name              | <ul style="list-style-type: none"> <li>• MALWARE_DETECTION</li> <li>• MALWARE_OUTBREAK_DETECTION</li> <li>• SECURITY_RISK_DETECTION</li> </ul> |
| Header (severity)  | Severity                | <ul style="list-style-type: none"> <li>• 2: Informational</li> <li>• 4: Low</li> <li>• 6: Medium</li> <li>• 8: High</li> </ul>                 |
| act                | The action in the event | blocked or not blocked   |
| app                | Protocol                | Example: HTTP  |
| appGroup           | Protocol group          | Example: HTTP  |
| compressedFileHash | Compressed file SHA1    | Example:<br>1EDD5B38DE4729545767088C5CAB<br>395E4197C8F3   |
| compressedFileName | File name in archive    | Example: mtxlegih.dll  |

| <b>TMEF KEY</b>    | <b>DESCRIPTION</b>             | <b>VALUE</b>   |
|--------------------|--------------------------------|--|
| compressedFileType | Compressed file type           | Example: 0   |
| cnt                | Total count                    | Example: 1   |
| cn1                | CCCA detection                 | 0 or 1   |
| cn1Label           | CCCA detection                 | CCCA_Detection   |
| cn2                | Indicates an APT-related event | 0 or 1   |
| cn2Label           | Indicates an APT-related event | APT Related  |
| cn3                | Potential risk                 | <ul style="list-style-type: none"> <li>• 0: Known risk</li> <li>• 1: Potential risk</li> </ul>   |
| cn3Label           | Potential risk                 | Deep Discovery_PotentialRisk   |
| cn4                | Threat type                    | <ul style="list-style-type: none"> <li>• 0: Malicious content</li> <li>• 1: Malicious behavior</li> <li>• 2: Suspicious behavior</li> <li>• 3: Exploit</li> <li>• 4: Grayware</li> </ul> |
| cn4Label           | Threat type                    | Deep Discovery_ThreatType  |
| cn5                | Aggregated count               | Example: 1   |
| cn5Label           | Aggregated count               | AggregatedCnt  |
| cn6                | CCCA Risk Level                | <ul style="list-style-type: none"> <li>• 0: Unknown</li> <li>• 1: Low</li> <li>• 2: Medium</li> <li>• 3: High</li> </ul>   |
| cn6Label           | CCCA Risk Level                | CCCA_RiskLevel   |

| TMEF KEY | DESCRIPTION                             | VALUE   |
|----------|---|---|
| cn7      | Heuristic flag                          | <ul style="list-style-type: none"> <li>• 0: Non-heuristic detection</li> <li>• 1: Heuristic detection</li> </ul>  |
| cn7Label | Heuristic flag                          | HeurFlag  |
| cs1      | Channel name                            | Example: IRCChannel1  |
| cs1Label | Channel name                            | IRCChannelName  |
| cs2      | Nickname                                | Example: IRCUser1   |
| cs2Label | Nickname                                | IRCUserName   |
| cs3      | Host name                               | Example: CLIENT1  |
| cs3Label | Host name                               | HostName_Ext  |
| cs4      | Network Group assigned to a source host | Example: monitor1   |
| cs4Label | Network Group assigned to a source host | Deep Discovery_SrcGroup   |
| cs5      | Source zone                             | <ul style="list-style-type: none"> <li>• 0: Not in monitored network</li> <li>• 1: In monitored network and trusted</li> <li>• 2: In monitored network and untrusted</li> </ul> |
| cs5Label | Source zone                             | Deep Discovery_SrcZone  |
| cs6      | Detection type                          | <ul style="list-style-type: none"> <li>• 0: Known detection</li> <li>• 1: Unknown detection</li> <li>• 2: OPS detection</li> </ul>  |
| cs6Label | Detection type                          | Deep Discovery_DetectionType  |
| cs7      | BOT command                             | Example: COMMIT   |
| cs7Label | BOT command                             | BOT_CMD   |

| <b>TMEF KEY</b> | <b>DESCRIPTION</b>                           | <b>VALUE</b>  |
|-----------------|--|---|
| cs8             | BOT url                                      | Example: trend.com  |
| cs8Label        | BOT url                                      | BOT_URL   |
| cs9             | Network Group assigned to a destination host | Example: monitor1   |
| cs9Label        | Network Group assigned to a destination host | Deep Discovery_DstGroup   |
| cs10            | Destination zone                             | <ul style="list-style-type: none"> <li>• 0: Not in monitored network</li> <li>• 1: In monitored network and trusted</li> <li>• 2: In monitored network and untrusted</li> </ul> |
| cs10Label       | Destination zone                             | Deep Discovery_DstZone  |
| cs11            | CCCA log is detected by                      | <ul style="list-style-type: none"> <li>• GLOBAL_INTELLIGENCE</li> <li>• VIRTUAL_ANALYZER</li> <li>• USER_DEFINED</li> <li>• RELEVANCE_RULE</li> </ul>                           |
| cs11Label       | CCCA log is detected by                      | CCCA_DetectionSource  |
| cs12            | CCCA address                                 | Example: 10.1.144.199   |
| cs12Label       | CCCA address                                 | CCCA_Destination  |
| cs13            | CCCA type                                    | <ul style="list-style-type: none"> <li>• IP_DOMAIN</li> <li>• IP_DOMAIN_PORT</li> <li>• URL</li> <li>• EMAIL</li> </ul>   |
| cs13Label       | CCCA type                                    | CCCA_DestinationFormat  |

| TMEF KEY                  | DESCRIPTION   | VALUE  |
|---------------------------|---|--|
| deviceDirection           | Packet direction  | <ul style="list-style-type: none"> <li>0: Source is external</li> <li>1: Source is internal</li> <li>2: Unknown</li> </ul>                           |
| deviceGUID                | Appliance GUID  | Example: 6B593E17AFB7-40FBBB28-A4CE-0462-A536  |
| deviceMacAddress          | Appliance MAC address   | Example: 00:0C:29:6E:CB:F9   |
| devicePayloadId           | An extendable field.<br>Format: {threat_type}:<br>{log_id}:{with pcap file<br>captured}{:extensions}* | Examples: <ul style="list-style-type: none"> <li>With pcap file captured:<br/>2:10245:P</li> <li>Without pcap file captured:<br/>2:10245:</li> </ul> |
| deviceRiskConfidenceLevel | Confidence level  | <ul style="list-style-type: none"> <li>1: High</li> <li>2: Medium</li> <li>3: Low</li> <li>0: Undefined</li> </ul>                                   |
| dhost                     | Destination host name   | Example: dhost1  |
| dmac                      | Destination MAC   | Example: 00:0C:29:6E:CB:F9   |
| dOSName                   | Destination host OS   | Example: Android   |
| dpt                       | Destination port  | Value between 0 and 65535  |
| dst                       | Destination IP address  | Example: 10.1.144.199  |
| duser                     | Mail recipient  | Example: duser1  |
| dUser1                    | Destination user name 1   | Example: admin   |
| dUser1LoginTime           | Destination user log on<br>time 1   | Example: Mar 09 2015 17:05:21 GMT<br>+08:00  |
| dUser2                    | Destination user name 2   | Example: admin   |

| <b>TMEF KEY</b> | <b>DESCRIPTION</b>             | <b>VALUE</b>                                     |
|-----------------|--------------------------------|--|
| dUser2LoginTime | Destination user log on time 2 | Example: Mar 09 2015 17:05:21 GMT +08:00         |
| dUser3          | Destination user name 3        | Example: admin                                   |
| dUser3LoginTime | Destination user log on time 3 | Example: Mar 09 2015 17:05:21 GMT +08:00         |
| dvc             | Appliance IP address           | Example: 10.1.144.199                            |
| dvchost         | Appliance host name            | Example: localhost                               |
| evtCat          | Event category                 | Example: Suspicious Traffic                      |
| evtSubCat       | Event sub category             | Example: Email                                   |
| externalId      | Log ID                         | Example: 11                                      |
| fileHash        | SHA1                           | Example:1EDD5B38DE4729545767088C5CAB395E4197C8F3 |
| filePath        | File path                      | Example: SHARE\\                                 |
| fileType        | Real file type                 | Example: 1638400                                 |
| fname           | File name                      | Example: excel.rar                               |
| fsize           | File size                      | Example: 131372                                  |
| hackerGroup     | Hacker group                   | Example: Comment Crew                            |
| hackingCampaign | Hacking campaign               | Example: Aurora                                  |
| hostSeverity    | Host Severity                  | Example: 4                                       |
| interestedIp    | Interested IP                  | Example: 10.1.144.199                            |
| mailMsgSubject  | Mail subject                   | Example: hello                                   |
| malFamily       | Malware family                 | Example: Duqu                                    |
| malName         | Malware name                   | Example: HEUR_NAMETRICK.A                        |
| malType         | Malware type                   | Example: MALWARE                                 |

| TMEF KEY         | DESCRIPTION                  | VALUE  |
|------------------|------------------------------|--|
| messageld        | Message ID                   | Example:<br><20090130042416.7060505@jovencitasvirgenes.com.ar>   |
| mitigationTaskId | Event task ID for mitigation | Example:<br>dc036acb-9a2e-4939-8244-dedbdba9ec4ba  |
| oldFileHash      | Mail attachment SHA1         | Example:<br>1EDD5B38DE4729545767088C5CAB395E4197C8F3   |
| oldFileName      | Mail attachment file name    | Example: excel.rar   |
| oldFileSize      | Mail attachment file size    | Example: 150000  |
| oldFileType      | Mail attachment file type    | Example: 1638400   |
| pAttackPhase     | Primary attack phase         | <ul style="list-style-type: none"> <li>• Intelligence Gathering</li> <li>• Point of Entry</li> <li>• Command and Control Communication</li> <li>• Lateral Movement</li> <li>• Asset and Data Discovery</li> <li>• Data Exfiltration</li> <li>• Nil (no applicable attack phase)</li> </ul> |
| pComp            | Detection engine/component   | Example: VSAPI   |
| peerIP           | Peer IP                      | Example: 10.1.144.199  |
| ptype            | Application type             | IDS  |
| reason           | Reason                       | Example: ["Protocol: 4"]   |
| request          | URL                          | Example: http://1.2.3.4/query?term=value   |

| <b>TMEF KEY</b>          | <b>DESCRIPTION</b>       | <b>VALUE</b>   |
|--------------------------|--------------------------|--|
| requestClientApplication | User agent               | Example: IE  |
| rt                       | Log generation time      | Example: Mar 09 2015 17:05:21 GMT +08:00   |
| ruleId                   | Rule ID                  | Example: 52  |
| ruleName                 | Description              | Example: Email message sent through an unregistered SMTP server  |
| sAttackPhase             | Secondary attack phase   | <ul style="list-style-type: none"> <li>• Intelligence Gathering</li> <li>• Point of Entry</li> <li>• Command and Control Communication</li> <li>• Lateral Movement</li> <li>• Asset and Data Discovery</li> <li>• Data Exfiltration</li> <li>• Nil (no applicable attack phase)</li> </ul> |
| shost                    | Source host name         | Example: shost1  |
| smac                     | Source MAC               | Example: 00:0C:29:6E:CB:F9   |

| Header (pname)     | Appliance product   | Deep Discovery Inspector |
| Header (pver)      | Appliance version   | Example: 3.8.1181        |
| Header (eventid)   | Signature ID        | 100134                   |
| Header (eventName) | Event Name          | RETROSCAN_DETECTION      |

| TMEF KEY               | DESCRIPTION                | VALUE   |
|------------------------|----------------------------|---|
| Header (severity)      | Severity                   | 8   |
| callback_address       | Callback address           | Example: http://1.2.3.4/                      |
| callback_time          | Callback time              | Example: Mar 09 2015 17:05:21 GMT +08:00      |
| category               | Category                   | Example: Reference                            |
| cnc_host               | C&C host address           | Example: 10.1.144.199                         |
| compromised_client     | Compromised client address | Example: 10.1.144.199                         |
| deviceGUID             | Appliance GUID             | Example: 6B593E17AFB7-40FB8B28-A4CE-0462-A536 |
| protocol               | Protocol                   | Example: HTTP                                 |
| rating                 | Rating                     | Example: Suspicious                           |
| related_attacker_group | Related attacker group     | Example: Elise Taidoor                        |
| related_malware        | Related malware            | Example: fosniw ge palevo                     |
| report_id              | Report ID                  | Example: 74c15fe0-90c9-446b-abc4-379d6d7213e7 |
| scan_category          | Scan category              | Example: C&C Server                           |
| scan_rating            | Scan rating                | Example: Dangerous                            |
| scan_ts                | Scan time                  | Example: Mar 09 2015 17:05:21 GMT +08:00      |
