Trend Micro™
Deep Security for Web Apps

This document steps you through the enrollment and on-boarding process for Trend Micro Deep Security for Web Apps. Before you begin the enrollment process, you will need to obtain a product activation key.

Enroll for an account

2. If you are a new Trend Micro customer, click Sign up now, then select No, I am a first time user, enter your product activation key and click Continue.

   If you already have an account on the Customer Licensing Portal, sign in to your account and then click Enter Your Key. Enter your registration key and proceed to step 5.

3. The next page displays information about your account, including the number of seats, expiration date, and type of license (Full or Trial). Select the checkbox to accept the Trend Micro License Agreement and click Continue.
4. On the next page, enter your account and contact information, then click Continue.

Note: If you are a reseller who is acting on behalf of a customer, select Yes at the top of the page and enter your information in the Reseller fields:
5. The next page indicates that Deep Security for Web Apps was registered successfully. You will also receive an email confirming that the product was registered successfully. To launch the Deep Security for Web Apps account setup process, click Open Console.

Set up your Deep Security for Web Apps account

1. To launch the Account Setup process, either click Open Console on the screen at the end of the registration process (shown above) or click the link provided in the confirmation email that you receive.

3. On the next page, confirm that your contact information is correct and make any changes that are required. Set the password for your account. The information that you enter is used to create a Global Administrator for your account.
4. On the next page, confirm that your corporate information is correct and edit it if necessary. Trend Micro will verify internet domain ownership, which is required before you can enable Deep Security for Web Apps services for your websites. Click Continue.
